

The tenth China hydrological technology and equipment exhibition in 2018

Time: May 30 -- June 1, 2018

VENUE: Shanghai Convention & Exhibition Center of International Sourcing

Guiding Organization: China Association for Science and Technology (CAST)

Ministry of Water Resources of the People's Republic of China

Hosting Organization: International Association of Hydrological Science

Committee on Hydrometeorology of China Meteorological Society
<CMS>

Supporting Organization: Hydrology Bureau of Ministry of Water Resources of the People's Republic of China

Branch of Meteorological Hydrology and Marine Instruments of China Instrument Society

International Association of Hydro Meteorological Equipment Industry (HMEI)

Shanghai Meteorological Society

Organizer: Minsheng Exhibition (Shanghai) Co., Ltd.

Official Website: www.grfexpo.com

Exhibition Review

“China hydrological technology and equipment exhibition” has been held for nine sessions by International Association of Hydrological Science <IAHS>, Committee on Hydrometeorology of China Meteorological Society <CMS> with support from multiple domestic and international organizations, which has achieved great success, is the only state-level professional exhibition in China, and has become the largest hydrological professional exhibition in Asia. In addition to Chinese users, buyers and dealers from Vietnam, Japan, Singapore, Indonesia, South Korea and the Middle East area have also come to China for visiting and negotiating trade cooperation.

Exhibition Profile

China owns a lot of rivers, leading to extremely heavy monitoring tasks of hydrology and water quality. Along with the rapid development of urbanization in China, problems such as poor quality of water environment, serious ecological damage and environmental risks of water become urgent. For constantly accelerating completion of hydrology and water quality monitoring system construction, further exploring the new methods of ecological restoration of water environment, exchanging advanced experiences among various provinces and regions, effectively improving understanding of majority of water conservancy practitioners about new technology, new knowledge, and preferably promoting application of new instruments and equipment in hydrology and water quality monitoring and ecological restoration of water environment, the tenth China hydrological technology and equipment exhibition, hereinafter referred to as "GRF EXPO 2018", organized by Minsheng Exhibition (Shanghai) Co., Ltd. will be held from May 30 to June 1 of 2018 at Shanghai International Purchasing Convention and Exhibition Center in China. On the occasion, exhibitors from a variety of countries and regions will exhibit their latest technology and equipment, to explore the cutting edge development trends and market dynamics.

Preparations of GRF EXPO 2018 have been fully launched. Professional audiences are technicians and managers who are engaged in related work and from various hydrology and water resources bureaus of basin institutions, hydrology (water resources) bureaus (stations), hydraulic engineering (water affairs) bureaus, environmental protection agencies, environment monitoring centers, reservoir administration bureaus, river affairs bureaus, irrigated area administration bureaus of various provinces, municipalities, cities directly under the central government, and counties. Specialists and scholars engaged in hydrology and water quality monitoring, and environmental management from colleges and universities, scientific research institutes, domestic and overseas technology and equipment suppliers engaged in hydrology and water quality monitoring, water environment management will come to visit and negotiate cooperation. We look forward to getting together with you on the site of "GRF EXPO 2018"!

Exhibition Period

Register and arrange exhibition: May 28-29, 2018 Opening ceremony: 9: 30 am May 29, 2018

Exhibition and transaction: May 30-June 1, 2018 Remove exhibition: 14:00 pm June 1, 2018

Objectives:

Construct a targeted communication platform for multiple side including users, scientific research institutes, manufacturers in the field of hydrological monitoring for communication of

supply and purchasing parties, promote the popularization and application of new technology, new equipment and new products of hydrological monitoring, and inject strong power for promoting the reform and development of hydrological monitoring.

Exhibition Categories:

Hydrological technology and equipment exhibition area: water quality monitoring equipment, hydrologic monitoring instruments, river forecasting, on-line monitoring technology and equipment, automatic hydrological station equipment, automatic recording, surveying and mapping equipment, GPS, GRS and GIS technology and equipment, etc.;

Hydrology information application exhibition area:

Related systems: water resources management software, flood control and drought resisting information management system, mountain flood disaster monitoring and early warning system

Monitoring center: center server, external network fixed IP, information management system software for hydrological water resources management;

Communication network: communication network platform based on mobile or telecom, Beidou satellite;

Telemetry terminal: hydrological water resources telemetry terminal RTU;

Measuring instruments: water level meter, rainfall sensor, camera;

Power supply mode: electric supply, solar power supply, battery power supply.

Hydrological analysis instruments and consumables exhibition area: related analytical instruments, equipment, consumables, etc.

Charge of Booth:

Participation	Specification & Requirement	Domestic Enterprise	JV	Foreign-funded Enterprise
Standard Booth	3m × 3m	16,800 Yuan/piece	19,800 Yuan/piece	4,000 Dollars/piece
Corner Booth	3m × 3m	17,800 Yuan/piece	20,800 Yuan/piece	4,500 Dollars/piece
Indoor Space	MOQ is 36 m ²	1,800 Yuan/m ²	2,000 Yuan/m ²	400 Dollars/m ²

Description of Booth:

A standard booth includes a piece of fascia board written in Chinese and English, two illumination lamps, partition board (The height is 250cm with accessible height of 246cm), a piece of discussion table, two chairs, a power socket compatible with 400W/220V and a piece of blanket;

A Exhibitors who order bare stand shall pay the expenses required in booth arranging. Refer to the Exhibitor Manual for details.

■ Technical seminar:

The charge is 20,000 Yuan/30 minutes for domestic enterprises and 5,000 Dollars/30 minutes for foreign-funded enterprises. A conference room which can accommodate about 120 people, which includes a projector, display, platform, chairs, speakers, paper, pens, potable water and publicity before exhibition, are provided in the meeting.

Exhibition Issues

1. Exhibitors shall fill out the "exhibition contract form" in detail and stamp the official seal, and mail or fax it to the organizing committee;
2. After signing up, the exhibitor must remit the relevant expenses to the designated account of the organizing committee within 7 working days;
3. The principle of stands arrangement is "register first, pay first, arrange first", the organizing committee shall have the right to adjust a few of stands;
4. The organizing committee will separately send out exhibitor manuals about matters concerned exhibits transportation, exhibition reception and accommodation, etc., three months prior to the launch of the exhibition.

For the newest exhibition information, please feel free to contact us in time.
